correlated with CNS5330). Each time we offer a course, we will collect a signature assignment (data) and store it in an electronic databank. At the appropriate time in the assessment cycle, we will draw a random sample of 8-10 assignments for each course from the databank and will evaluate them against the pertinent rubric. At least one faculty member

plans for implementation and/or remediation. We will draft and distribute an annual report that documents the

of this new assessment cycle during Summer 2021. (See the following table for the place of the annual advisory council review in the assessment cycle.)

As part of the report, we will assign follow-up steps to specific program faculty members for implementation. These faculty members will be responsible to document any changes made and report on them at the next workshop. Their follow-up reports will close the loop on the assessment cycle year. <u>Timeline for Implementing First Assessment Cycle (2021-2023)</u>:
